Education

Bachelor of Technology - Master of Technology (IT) Dual Degree

7.22 CGPA (Till now)

International Institute of Professional Studies, DAVV Indore

June 2026

Senior Secondary School, Science (CBSE)

84.4%

Secondary School (CBSE)

90.8%

Technical Skills

Languages: Java, JavaScript, MySQL, C++

Web development : React, bootstrap, Tailwind, Redux, Node.js, Express.js, PostgreSQL, MongoDB

Tools: Git/Github, REST APIs, VS Code, Postman

Coursework: OOPS, DBMS, Operating Systems, DSA, Computer Networks

Projects

Online Video Interview Remote Coding Platform

- Built a full-stack interview platform supporting 1-on-1 video calls and live coding.
- Implemented secure code execution with automated test-case based evaluation.
- Designed RESTful APIs using Node.js and Express.js for sessions and submissions
- Integrated Clerk authentication and Stream Video/Chat for real-time communication.
- Added async background jobs using Inngest for feedback and notifications.

Shoppingz - FullStack Web App

- Developed a full-stack store with PostgreSQL, Express, React, and Node.js supporting CRUD for products, inventory, and cart checkout.
- Implemented authentication, REST APIs, global state (Zustand), rate limiting, and styled with TailwindCSS + DaisyUI. Deployed with scalable workflows for production readiness.

Movie Recommendation System

- Developed an AI-driven movie discovery platform with personalized recommendations for any query.
- Built with React, Redux, TailwindCSS, Firebase Authentication, and integrated OpenAI API.
- Enabled seamless, multi-device browsing and enhanced user experience.

Certifications & Experience

Software Engineering Virtual Intern (Job Simulation)

2025

JPMorgan Chase and Co. Forage

- Developed REST API controllers in Spring Boot with layered architecture, Integrated Apache Kafka for asynchronous event-driven processing
- Used H2 in-memory database for API testing. Built and validated REST API integrations for backend services

Complete Web Development Bootcamp

2023

By Dr. Angela Yu

- * In this course various technologies were taught needed to become a **Full-Stack Web Developer**
- * Which includes HTML, CSS, Javascript, **Node.js**, React.js, PostgreSQL, Authentication etc
- * Learning throughout this course i was able to make some nice websites with smooth animations and dynamic pages.
